

SKY FINE - spray products without propellant

Let us introduce the new generation of spray products! They are environmentally- and user-friendly because no propellants are used. "Pressure pumps" will spray the content. Perfect for those who have to deal daily with chemical lubricants. Higher yield by "real" 300ml active substance in the can. The impact of gases at the workplace will be reduced.

Skin Protection

According to plan: protection beforehand, cleaning and care throughout and after work. Dermatologically tested. High-valued raw materials ensure the high quality of our products. With great pleasure, we will compile your skin protection plan.

Have we raised your interest in our products?

Complete solutions at the service of humans and technology

Since almost thirty years we are known as a reliable and innovative supplier of chemical technical products for manufacturing, assembly and maintenance in industry and craft.

We are characterized by flexibility and dynamism.

Our program covers a wide range of selected products that are constantly checked and improved. Only tested high quality raw materials flow into our production and thus ensure the latest state of technology.

Whether technical sprays for maintenance, assembly, cleaning or care, special adhesives, anaerobic adhesives and sealants, special greases and much more – we deliver the desired products and quantities at short notice!

Do you have any further questions or suggestions?
Do you need technical advice?
Please don't hesitate to contact us and give us a call!

Our motivated and flexible team is at your disposal and will be pleased to respond to any of your queries.

Your satisfaction is our goal - today and in future.

Your Team of **EURO-LOCK**

Adhesives and Sealants

We offer the right solution for every application, from anaerobic- to cyanoacrylate adhesives over one- and two-component adhesives (polyurethane, methacrylate, epoxy, MS-polymer). We thus enable the adhesion of various materials from very small up to larger parts.

Technical Aerosols

Our aerosol product range includes more than 100 products for industrial and craft sectors in the areas of cleaning, maintenance, assembly and car body construction. Selected chemical substances ensure the protection and readiness for action of equipment and machinery. Our Products are constantly checked, modified if required and adjusted to the needs of the market.

Lubricating Pastes

We offer highly durable assembly aids for the production technology with a temperature range between -30 and + 1400°C. The various high-quality additives guarantee the longevity of our products even if it is MOS2-, graphite-, aluminum- or ceramic content. We always guarantee high processing quality!

Greases

EURO-LOCK greases help to reduce friction and wear and thus prevent longer downtimes and repairs. We offer greases for standard application as well as for extreme use. Whether stable when used under the influence of moisture or at high or rather low temperatures with physiological harmlessness.

Cooling Lubricants

No matter what kind of application, we supply mineral-oil-based, semi-synthetic and synthetic cooling lubricants for all areas of metal cutting processes. Processing procedures are optimized by excellent lubrication and cooling. It ensures a long tool service life in order to reduce operating costs.

Technical Fluids

Liquid agents for cleaning, lubrication, care and separating. Our technical fluids are required for obtaining the operational capability of machinery and equipment. We can supply products, which are also filled in aerosol cans, in casks sizes from 1 ml up to 1000 liters. We offer you the complete program for care and maintenance.
